Safe storage and transportation of your medical equipment

We specialize in packaging, storage, delivery and transportation for all levels of healthcare, medical and PPE needs. Our Temperature Controlled Shipping and Warehousing can provide a Heated, Cold Chain (2-8°C), Ambient (15-25°C) – Health Canada Temperature Regulation 0069 – for the duration of the shipment and warehousing.

Here's how we help:

- **Clinical Trials:** Our cold chain services include temperature-controlled packing, vehicles, and supplies with in-transit dry ice / gel-pack replenishment and temperature monitoring.
- **Life Sciences:** We will carefully manage the delivery and transportation of all living organisms, such as plants, animals and human organs.
- **Medical Equipment and Devices:** Whether you're sending pacemakers, artificial heart valves, titanium pins, we will help get your shipments to where they need to go, fast.
- **Personal Protective Equipment (PPE):** Our team can help in supplying, purchasing, storing and delivering personal protective equipment directly to your workplace.

Once your shipment is in our possession, your concerns about temperature consistency are over. Air, Sea and Ground.
