## Keep Your Workplace Open, Safe & Protected

Businesses have been greatly affected by the Covid-19 Pandemic. Critical Path is currently assisting our clients with both their current needs as well as future needs in advance of a predicted second wave of Covid-19 this fall. We help businesses maintain a safe workplace that is equipped and in compliance with government requirements to reopen and stay open. Our team can help in supplying, purchasing, storing and delivering personal protective equipment directly to your workplace.

### Here's how we help:

- **Supply:** we'll coordinate your equipment list directly with a team of trusted and cost-effective suppliers to get you what you need when you need it.
- **Purchasing:** we'll take care of ordering all your PPE equipment so that you can save time, reduce headaches, and stay focused on running your business.
- **Delivery:** with our extensive fleet of trucks and drivers, we will arrange contactless delivery directly to your workplace whenever you need it.
- **Storage:** we will keep your equipment safe and protected in our secure storage warehouses around the clock monitoring.

**We would be happy to discuss the needs of your specific business.**
